INVITATION

The AOPAS organizing committee is pleased to invite you all to the 3rd Annual Conference Of Association Of Pelvi Acetabular Surgeons. AOPAS 2019 to be held from 29th to 31st March, 2019 at Mayfair convention centre Bhubaneswar. The theme of the conference is “Approach Right, Reduce Anatomically, Fix Well and Avoid Complications - Success could be yours”. The AOPAS is the most active society of Pelvic-acetabular surgeons of India and it has grown by leaps and bounds in the last few years. The society is providing numerous fellowship and clinical skill opportunities to its members. It is indeed a great pleasure to host the annual conference at Bhubaneswar, the smart city. There are many didactic lectures, cadaveric workshop and live surgeries in the conference. For the first time we are going to introduce the cases based discussion and meet the master session which will be much more useful to all surgeons practising pelvic-acetabular surgeries. We are also including hip surgeries and Total hip replacement in the discussion and live surgeries session. During march, the weather will be very pleasant with just the right amount of chill to keep your senses alert and make you feel like going out. Odisha is famous throughout the world for tourism and the cuisine. The Jagannath Dham Puri, the Sun Temple Konark and the famous Chilika Lake are just few kilometres away from the city. The Dhauli Stupa of Bhubaneswar witnesses the conversion of Chandashoka to Dharmashoka. There are many Heritage sites, Religious places, Monuments, Art & Architecture, Wildlife, Waterfalls, Amusement theme parks & everything that interests the tourists. So dear friends, we on behalf of the organizing committee would like to welcome you along with your family and friends to AOPAS 2019 for an enriching scientific treat and an enchanting & refreshing holiday to temple city Bhubaneswar.

Organizing Chairman
Dr Chitta Prasad Das

MESSAGE FROM IPS PRESIDENT & SECRETARY

Dear Friends,

As the president of “Association Of Pelvic Acetabular Surgeons” (AOPAS), I am organising the forthcoming (3rd) annual event of this association at Bhubaneswar from 29th to 31st March, 2019. This meeting is poised to showcase an academic activity of very rich quality over these three days. I have the pleasure in inviting you to join us in this meeting and making it a great success.

Bhubaneswar, a part of the “golden triangle” along with Puri and Konark, is a hub for major tourism activity in eastern India. It offers excellent opportunities for tourists of every interest. This is a place worth visiting with family and friends. It is very well connected to all major cities of India by air, train and road. I personally invite each one of you to come here with your family.

We have invited some of the most outstanding surgeons, known globally for their work and knowledge, from centres of excellence in the USA and South America, as our international faculties. Dr. Henry Saggi from Cincinnati, Dr. Tania Ferguson from Nashville and Dr. Carlo Sancineto from Argentina shall be teaching along with our top national faculties in this meeting.

To add extra value to the meeting, we are trying to organise workshops and cadaveric exercises to suit both beginners and advanced level delegates separately. Because the delegates registering for this event are expected to be of different levels, it was thought to keep workshops for both the level of delegates to keep most people engaged gainfully.

Finally, we are committed to make the program more interactive with case based presentations, “Meet the Masters” (for an open dialogue with some of the top surgeons of the world), panel discussions with crossfire sessions and competition papers. In addition, Live surgery is on the card for total hip replacement surgery in situations such as for failed acetabular surgery. It shall be demonstrated through a newer MIS approach (direct anterior approach), which avoids going through the old scar of acetabular surgery, thus avoiding surgical difficulties, unnecessary greater morbidity and delayed recovery.

Live surgery through modified stoppa’s approach is planned as well subject to availability of cases during the event. In addition, we are planning to have Pelvic acetabular osteotomy (PAO) as live surgery in dysplastic hips as well. These live surgeries are going to be demonstrated by none other than the current designers of these procedures known for their expertise in these areas, who are our esteemed international faculties in this event.

There are many more innovative teaching modules conceptualised and we shall update you about it from time to time.

Again, expecting a great participation in Bhubaneswar by all our members and their families in this 3rd annual event in March 2019.

With best wishes,

Organizing Chairman
Dr Chitta Prasad Das

Organizing Secretary
Dr Sujit Kumar Tripathy

TOURIST ATTRACTIONS

East India Golden Triangle

The eastern region of India, though does not see many visitors in the form of tourists, but is extremely beautiful. This 5 nights and 6 days East India Golden Triangle tour cover Bhubaneswar, Konark and Puri. These 3 places have a lot of religious importance. You will get a chance to visit some of the most well-known temples of these places such as Konark Sun Temple, Lingraj Temple and so on.

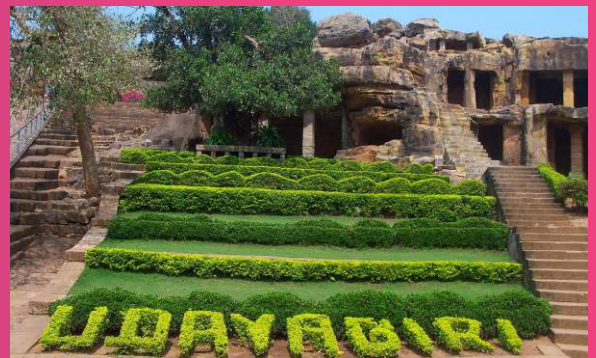

Day Excursion to Nandankanan

Nandankanan Zoological Park is a 400-hectare zoo and botanical garden in Bhubaneswar, Odisha, India. Established in 1960, it was opened to the public in 1979 and became the first zoo in India to join World Association of Zoos and Aquariums in 2009.

Bhubaneswar Adventure Tour

If you love indulging in adventure activities then India is a perfect destination for you, that offers superb prospects for adventure tourism. For the same reason, in the past few years, India has become quite famous as an adventure travel destination, all across the world. One can indulge in a number of adventure activities.

Udayagiri and Khandagiri Caves

Udayagiri and Khandagiri Caves are partly natural and partly artificial caves of archaeological, historical and religious importance near the city of Bhubaneswar in Odisha, India
